

VACANCY

A vacancy exists for the post of **Supervisor, Meter Inspection** in the Transmission & Substation Department of Belize Electricity Limited (Belize City).

Duties

- Supervise the implementation of the Company's Revenue Protection Program. This includes monitoring and managing the work performance of contractors assigned to the loss reduction initiative and ensure proper follow-up and efficiency in the execution of their duties.
- Supervise the day-to-day operations of all the resources assigned to the Revenue Protection Program.

Qualifications

- Associate's Degree in Mechanical and Electrical Engineering with 10 years of relevant working experience.

Requirements

- Must have basic electric theory knowledge and ability to apply this knowledge to actual situation.
- Must be able to operate equipment, such as TDR and Power Analyser, to properly identify tampering or diversion of power.
- Must be knowledgeable of CT/PT ratio, burden and connection.
- Must understand BEL's New Service Installation Manual, Standard Metering Arrangement Manual and Distribution Standards.
- Must be able to analyse data
- Must be able to work effectively as a team player
- Must be able to work within deadlines
- Must be able to multi-task
- Must possess a valid Driver's License

Salary: in accordance with Company's Salary Structure.
