

VACANCY

A vacancy exists at Belize Electricity Limited for a **Computer System Technician III** in the Information and Communication Systems Department (Belize City).

Duties:

- Assist with the planning, designing, installation, and connectivity of computer and network systems. This includes, but is not limited to, establishing, configuring, maintaining, supporting, and optimizing all new and existing network hardware and software, and communication mediums.
- Proactive monitoring and reporting of all communication mediums.
- Analyse and resolve hardware and software problems, and provide end user training and support where required.
- Ensure continued stability and security of BEL's voice, data, video, and wireless network services.

Qualifications:

- Associate Degree in Computer Information System, Networking or Communications with 5 years' working experience.
- 3 years' experience installing, configuring and securing enterprise-wide LANs, WANs, WLANs and VPNs.

Requirements:

- Knowledge of Cisco IOS and PC operating systems
- Experience in troubleshooting hardware such as PCs, routers, bridges, switches, modems and network interface cards
- Knowledge of current networking protocols and standards
- Experience in installing network cabling and patching telephony systems
- Be a team player who is assertive with good interpersonal skills
- Able to conduct research into networking issues and products as required
- Ability to prioritize and execute tasks in a high-pressure environment
- Self-motivated
- Demonstrate keen attention to detail
- Proven analytical and problem-solving abilities
- Strong customer service orientation
- Good communication and report writing skills
- Valid drivers' license

Salary: In accordance with Company's Salary Structure
