BEL Works to Repair 115 kV Transmission Line Infrastructure

Belize Electricity Limited (BEL) advises the public that it is working to repair damage to the 115 kV transmission line in the Belize District and restore power supply to a portion of Belize City and several rural areas.

At 8:33 a.m., power supply was lost to the Ladyville Feeder which includes that area along the Northern Highway from Mile 1 to Crooked Tree Village and those areas along the Old Northern Highway. Also affected is the area from Mile 1 to Mile 25 along the Western Highway.

Investigations have revealed that the 115kV transmission line near the West Lake Substation was touching the 22kV distribution line. Work crews are presently installing anchors and tensioning the lines. Repair works are expected to be completed by 3:30 p.m.

BEL apologizes for the inconvenience caused by this outage. For more information call 0800-BEL-CARE or 0-800-235-2273.
