BEL Works to Restore Power to the Toledo District

Belize Electricity Limited (BEL) is working to restore power to the Toledo District after power supply was lost at 7:02 a.m. today. Last night, the area also experienced a series of intermittent outages ranging from one minute to just over two hours.

Work crews were dispatched to the field last night to investigate the cause of the power outages; however inclement weather coupled with the rugged terrain through which the transmission line serving the town runs have hindered progress. This morning, work crews from Belize City, Belmopan and San Ignacio were dispatched to the Toledo District to assist the local crew with investigations.

Intermittent power outages in the Toledo District are expected to continue today, until the source of the problem can be identified and repaired.

BEL regrets any inconvenience caused by this outage and will provide updated information as they become available. For more information kindly call 0-800-BEL-CARE (0-800-235-2273).
