- Assist in the installation and maintenance of the machines and other mechanical equipment owned and operated by Belize Electricity Limited.
- Diligently assimilate all information contained in maintenance manuals to ensure a high level of familiarity with maintenance instruction, mechanical drawings, spare parts and supplier recommended repair methods for all mechanical equipment in BEL generating plants.
- Carry out instructions precisely as directed by the Superintendent, Maintenance & Operations or his/her designate.
- Be able to efficiently troubleshoot, diagnose and repair simple mechanical faults.
- Responsible for the proper use of vehicles and other equipment he may use and operate.
- Be able to carry out mechanical maintenance on Diesel Prime Movers, up to 2,000hrs without supervision.
- Report all abnormalities or events encountered in the execution of a job which may adversely affect maintenance execution or deemed responsible for observed defects or malfunction.
- Ensure all assigned duties are carried out efficiently in a safe and environmentally friendly manner.
- Prepare basic written job reports for all jobs assigned including accurate accounting of materials used.
- Observe all traffic laws and abide to the company's vehicle policy while operating company owned vehicles in transportation of self and other employees to and from work assignments.
- Responsible for the proper care of vehicles and other equipment including tools and instruments used and/or operated by crews being supervised.
- Adhere strictly to the Generation Safety Action Plan paying particular attention to Job Planning/Risk Management and the proper use of PPE.
- Responsible for on-the-job training of all subordinate maintenance personnel including safety rules and regulations.
- Responsible for proper housekeeping of work area during and after conducting works on equipment.
- Be familiar with all EMS procedures such as Oil Spill Response, etc.
- Any other related duties that may be assigned from time to time.

## **Education and Experience:**

- Associates Degree in Mechanical Engineering.

**Required Skills/Abilities:**

- Basic knowledge of electricity.
- Basic knowledge of all the components within a Generating Station.
- Proficiency in Job Planning and timely and accurate execution of assignments.
- Excellent critical thinking, problem solving and data analytics abilities.
- Working knowledge of Microsoft Office applications
- Action and results oriented with excellent collaborative skills for pursuing shared goals.
- Excellent verbal and written communications skills

**Salary:** In accordance with Company's salary structure.
