## **BEL Advisory on Approaching Tropical Storm Earl**

Belize Electricity Limited (BEL) advises the public that there continues to be illegal and hazardous connections that threaten public safety. Therefore, there may be a need to disconnect power supply in certain areas of the country, due to hazards caused by illegal or improper electrical connections.

To safeguard lives, BEL has connected over 400 households countrywide, under the “Connecting Homes Improving Lives” program, since the flooding last year. The Company continues to encourage the public countrywide to apply to the program for safe and legal connection.

BEL also reminds the public that, in the event there is loss of power supply due to damages caused by the approaching storm, the Company will only dispatch crews to conduct repairs and power restoration works as soon as the “**All Clear**” is given and it is safe to do so.

BEL advisories are available via radio and television stations, Facebook and SMS notifications.

BEL encourages the public to report damages to the power system by calling 0-800-BEL-CARE (0-800-235-2273) or sending a direct message to BEL’s Facebook page.
