BEL Continues Restoration to Remainder of Belize District

At midnight last night, power supply had been restored to 96% of the country and 86% of customers in the Belize District.

As has been the case since Thursday, BEL's teams resumed works early this morning and are focusing on completing restoration to the following areas during today and tomorrow:

- Sandhill
- Sandhill to Maskall
- Sandhill to Crooked Tree
- Burrell Boom and surrounding communities
- Boom Road to Flowers Bank
- Boom Road to Rancho
- The remainder of Caye Caulker

BEL reminds customers that they will be experiencing intermittent outages in order to reconnect additional customers.

As the Company restores power to these communities, several premises will be unable to connect due to damages to transformers and service entrances which occurred during the passage of Hurricane Earl.

BEL is therefore offering the services of licensed electricians, contracted by the Company, to conduct inspection and repairs of damaged service entrances. Interested customers are encouraged to request BEL's assistance by calling **0-800-BEL-CARE (0-800-235-2273)** or for more information.
