99% of Customers Restored

At 6:00 p.m. today, Belize Electricity Limited (BEL) has achieved its target of having 99% of customers countrywide connected by the end of today.

Communities connected today, include from Sandhill to Crooked Tree and a portion of those along the Old Northern Highway and a portion of Belize River Valley.

The only remaining communities in Belize District without power supply are those along the Old Northern Highway from Altun Ha to Maskall and five villages in the Belize River Valley.

BEL is aware that there are some individual customers in areas that are still without electricity due to transformers, spurs and poles requiring replacement. These works are underway alongside restoration efforts.

Customers may call BEL 0-800-BEL-CARE (0-800-235-2273) for assistance with individual service issues.
