

BEL PARTNERS WITH BELIZE DIABETES ASSOCIATION OF NEW YORK *to Provide Free Services in Belize*

Belize Electricity Limited (BEL) partnered with the Belize Diabetes Association of New York (BDANY) for the 4th consecutive year to support its annual medical mission to Belize from July 3 to 7, 2017.

BEL's contribution of \$4,000 to BDANY is towards improving the quality of life in Belize through free consultation and medical services in the Belize and Stann Creek Districts.

A team of eight, led by Dr. Steven Wells, Podiatrist, Foot Surgeon, Professor and President of the Diabetes Foot Care Group in New York, conducted screening, educated diabetic patients and provided free medication.

BDANY also provided education on diabetes prevention, consultation and training in diabetic foot care to medical professionals, performed minor foot surgery and consultation on complex diabetic foot care, and educated the public on complications associated with diabetes.

“ BEL’s unwavering commitment to the work of the Belize Diabetes Association of New York for the last four years is invaluable. We are grateful for this partnership, which allows us to provide ongoing service to the people of Belize, ”

Mrs. Vanessa Jenkins-Young PT, MA, MPH
President, Belize Diabetes Association of New York

The BDANY team also visited BEL to deliver educational sessions to staff.
