BEL Fulfils its Promise to Connect Four Communities

Belize Electricity Limited (BEL) today fulfilled its promise and energized power lines to supply the villages of Selena, Santa Teresita, Los Tambos and San Marcos for the benefit of 300 households in the Cayo District.

While the main parts of these villages currently have access to electricity from BEL, works continue to complete installation of power lines to all remaining sections by the end of March 2018. Residents are encouraged to acquire the necessary Public Utilities Commission Electrical Installation Certificate and thereafter apply to BEL for service either at the BEL San Ignacio Branch Office; or call BEL at 0-800-235-2273 for more information.

New power lines being energized on Iguana Creek Road to supply Selena, Santa Teresita, Los Tambos and San Marcos Villages.

Since 2014, BEL has connected over 100 communities countrywide and is confident that by 2020, 98% of all Belizean households will have access to safe, reliable and affordable electricity.
