BEL reminds Caye Caulker Customers to conserve Energy during Peak Hours

Earlier today, representatives of Belize Electricity Limited (BEL) met with key stakeholders in Caye Caulker to provide a status update on the supply of electricity to customers on the island. Questions and concerns were addressed from participants who included representatives of the Caye Caulker Village Council, Belize Tourism Industry Association, Caye Caulker Business Association (CCBA), National Emergency Management Organization (NEMO) and the media.

Three generation units continue to provide power supply to customers on the island. However, with the onset of the evening peak hours, BEL advises that energy consumption is escalating in Caye Caulker.

The Company reminds customers to practice energy conservation, in particular curtailing the use of air conditioners, to ensure that power supply can be maintained for all customers on the island particularly during the peak hours:

- 8:00 a.m. to 11:00 a.m.
- 2:00 p.m. to 3:00 p.m.
- 5:00 p.m. to 10:00 p.m.

The Company will continue to provide regular updates and will hold a follow up meeting with key stakeholders next week.
