## Locally Sourced Generation Unit Now in Operation and Supplying Caye Caulker

Belize Electricity Limited (BEL) advises customers in Caye Caulker that the locally sourced generation unit is now in operation and was successfully connected to the island's power system on Sunday, January 5, 2020.

Since being brought on line, our teams have been monitoring and assessing the unit's generation capacity and will continue to do so during the week to ensure that the unit functions reliably and consistently.

The Company thanks all customers for their understanding and participation in energy conservation since Thursday, January 2. We also acknowledge our dedicated team of employees who have been working tirelessly to ensure that power supply was restored to normal service to Caye Caulker.

BEL remains committed to providing regular updates and plans to hold a follow up meeting with customers in Caye Caulker later this week.
