## BEL Restoration Update Sunday, November 6, 2022

Belize Electricity Limited teams continue to concentrate efforts on completing restoration of service to the remaining areas of the Belize and Cayo Districts where the most severe damages to the power system were sustained from Hurricane Lisa.

On Saturday, November 5, power supply was restored as projected to the remaining areas of Belize City, including Belama and portions of King's Park and the Downtown area; also Burrell Boom, Hattieville, and the communities of Fresh Pond, Buttercup Estate and Vista del Mar in rural Belize District.

Today, our teams are diligently working to complete repairs in the Belize River Valley area, communities along Mile 20 to 25 George Price Highway and a remaining portion of La Democracia.

As of 7:00 a.m. on Sunday, November 6, 2022, we had restored power to 99% of customers in the Cayo District, 98% in Belize City, and 95% in rural Belize District.

In addition to our aim of completing the major restoration works in areas with major system damages, **our teams are now addressing localized issues responsible for pockets of customers still without electricity in previously restored areas.** These localized issues are primarily due to specific repairs needed transformers, low voltage lines, and customer service lines, the vast majority of which should be resolved today.

We assure customers that we continue to pool all available resources to ensure a well-coordinated and efficient approach to energizing neighborhoods today, where customers are still without a safe connection to BEL's supply.

Customers can report and monitor outages and restoration using our BEL 24-7 App, and by joining our Facebook Power Updates Group. Call 0-800-BEL-CARE / 0-800-235-2273 or message us on Facebook or WhatsApp at 613-0672 (Belize District).
