## BEL Successfully Hosts Media Energy Workshop

Belize Electricity Limited (BEL) hosted a Media Energy Workshop today at our BEL Corporate Headquarters in Belize City. The workshop brought together journalists and media professionals countrywide for an in-depth discussion on Belize's energy landscape.

Our key technical experts Omereyon Fregene, Manager of Energy Supply & System Control, and Sheena Simpson, System Planning & Engineering, led discussions on Belize's Short-term Energy Outlook and BEL's plans for Expansion & Modernization. The presentations highlighted important topics including power demand trends, supply challenges, expansion plans, and our Customers' crucial role in demand side management.

The workshop aimed to equip media professionals with the technical and historical background, ensuring informed reporting on critical energy topics. Our media partners play a vital role in helping the public understand the complexities of the energy landscape.

BEL remains committed to building a strong partnership with the media and other stakeholders, as we continue to provide you with safe, reliable, and sustainable energy solutions.
