## BEL Hosts Media Energy Workshop on the 2025 ARP Submission & Advanced Metering Infrastructure

Belize Electricity Limited (BEL) hosted a Media Energy Workshop today at our BEL Corporate Headquarters in Belize City to discuss BEL's plans to build a modern energy services infrastructure.

Our key technical experts Sean Fuller, General Manager for Finance & Business Support, and Philip Codd, AMI Project Manager, led discussions on BEL's 2025 ARP Submission and our investments in Advanced Metering Infrastructure (AMI).

The presentations highlighted important topics including the cost of power, electricity rates, key investments to improve reliability and resilience, and empowering Customers with forward-looking technologies like smart meters.

The workshop aimed to equip media professionals with the technical background, ensuring informed reporting on these key energy topics. Our media partners play a vital role in helping the public understand the complexities of the energy landscape.

BEL remains committed to building a strong partnership with the media and other stakeholders, as we continue to provide you with safe, reliable, and sustainable energy solutions.
